MD. MUSHFIQUR RASHID MARMO

Product Manager, Tech | AI & Machine Learning | Full-Stack Development
mushfiqur.tech@gmail.com | +8801720097317 | Bashundhara RA, Dhaka, Bangladesh
linkedin.com/in/mushfiqur-rashid-5a8583238 | github.com/MushfiqurRashid

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with experience across AI program management, product management, full-stack development, digital product delivery, and AI/ML projects. Experienced in translating business requirements into technology solutions, coordinating stakeholders, building and deploying web platforms, and managing production infrastructure. Strong foundation in Python, SQL, machine learning, RAG, React, Next.js, Node.js, PostgreSQL, Vercel, and VPS operations.

PROFESSIONAL EXPERIENCE

EMPIRE CAPITAL BD | Product Manager, Tech | July 2026 - Present

- Lead product and technology implementation for digital platforms, translating business requirements into product specifications, development tasks, and production-ready solutions.
- Delivered the Empire Capital corporate website through requirements analysis, full-stack implementation, deployment, domain configuration, and ongoing technical operations.
- Led development of Bangla Blend, a Bangladesh-focused e-commerce platform for regional spice products, gifts, recipes, and food-heritage content; managed full-stack implementation and production deployment.
- Manage VPS hosting, Vercel deployment, domain and DNS configuration, maintenance, and technical operations across digital products.
- Integrated Google Tag Manager and Meta Pixel into Bangla Blend for analytics, conversion tracking, and digital marketing measurement.
- Currently leading development of Empire Philately, an e-commerce platform for selling philately products.

GRAMAI | Associate Program Manager | June 2026 - July 2026

- Supported AI-focused programs, corporate AI training, stakeholder engagement, meetings, and program execution.
- Coordinated technology and AI initiatives across stakeholders, translating program objectives into actionable activities and deliverables.

FAIRFARM BD | Co-Founder | January 2025 - June 2026

- Co-founded an agritech startup focused on digital solutions and technology-enabled services for farmers.
- Worked alongside undergraduate studies during 2025 and transitioned to full-time work after graduating in December 2025.
- Led development and improvement of websites, applications, and the digital product ecosystem.
- Contributed across technology, product development, business development, startup operations, and agricultural technology initiatives.
- Participated in stakeholder, partner, and collaborator meetings and supported product execution, hosting, deployment, and production infrastructure.

EDUCATION

B.Sc. in Computer Science and Engineering | North South University, Dhaka | CGPA: 3.03 / 4.00 | 2025
HSC | Birshrestha Munshi Abdur Rouf Public College | GPA: 4.25 / 5.00 | 2019
SSC | Jamalpur Zilla School | GPA: 5.00 / 5.00 | 2017

SELECTED PROJECTS

Physics-Guided GSM Prediction with Explainable AI | 2025 | github.com/MushfiqurRashid/GSM-Prediction-with-XAI

- Built an end-to-end machine learning pipeline covering data cleaning, SQL extraction, and feature engineering; benchmarked 22 regression models and applied SHAP and LIME for explainability.

Agriculture RAG Chatbot - FairFarm BD | github.com/MushfiqurRashid/Agriculture-RAG-Chatbot

- Developed an AI-powered agricultural question-answering system using Retrieval-Augmented Generation, FastAPI, FAISS, and large language models.

Intelligent Crop Recommendation System | 2025 | github.com/MushfiqurRashid/Intelligent-Crop-Recommendation-System

- Developed an ensemble machine learning classifier using structured agricultural data to provide data-driven crop recommendations and decision support.

LEADERSHIP & RESEARCH

Team Leader - LLM Research Project | January 2024 - December 2025 | North South University, Dhaka

- Led a 5-member team evaluating large language models for cultural representation; designed 200+ structured prompt templates and coordinated research tasks and milestones.

Team Leader - NASA International Space Apps Challenge | October 2023 | Global 2nd Runner-Up | Team of 5

- Directed end-to-end project development, data analysis, visualization, and documentation under a 48-hour deadline.

TECHNICAL SKILLS

Product & Program Management: Product Management, Program Management, Project Management, Requirements Gathering, Stakeholder Management, Corporate AI Training, Cross-functional Coordination
Full-Stack Development: React, Next.js, Node.js, TypeScript, JavaScript, REST APIs
AI & Machine Learning: Python, Machine Learning, NLP, Transformers, RAG, Scikit-learn, PyTorch, TensorFlow, Explainable AI
Data & Databases: SQL, PostgreSQL, MySQL, MongoDB, Pandas, NumPy, Data Modeling, ETL
Cloud & Deployment: VPS Management, Hostinger, Vercel, Domain & DNS Management, Production Deployment, Web Hosting, Git, GitHub
Analytics & Marketing Technology: Google Tag Manager, Meta Pixel, Conversion Tracking, Web Analytics
Languages: Bangla (Native), English (Proficient)

CERTIFICATIONS

- Machine Learning A-Z: AI, Python & R - Udemy
- NASA International Space Apps Challenge - Global 2nd Runner-Up, 2023
- UAP Hackathon - Qualifier, 2023

PUBLICATION

Evaluating Inclusivity & Diversity of Large Text-to-Image Models: A Case Study on Bangladeshi Cultural Representation - Work in Progress, NSU 2025.
